# Foster Care Provider Credential Information in eXPRS

Did you know …

> *… that you can see credentials for your Foster Care records on the eXPRS Home Page?*

When you login, the **My Credentials** section will display key information for the Foster Care provider record(s) associated to your account.

Key fields include:

- **CHC Expires:** Shows as N/A for Foster Care providers, because the Criminal History Check is validated as part of the Foster Care site license and certification process.
- **PEAA Expires:** The last date your Foster Care Provider Enrollment Application and Agreement is valid. **Not Found** will appear if the record was converted and the PEAA has not yet been renewed/updated.
- **Approved to Work Expires:** The last valid date of that FC record's site license/certification date.

Remember…

> *… It is important for FC providers to know their credential information and coordinate with the CDDP to keep their credentials updated to prevent gaps in payment, since they cannot be paid for services past the Approved to Work expiration date.*
